

Precautions

- Use gloves during the entire process
- If you prefer, you can also use a mask
- Do NOT touch the face or eyes with the product

Step #1

- Rinse the hair twice thoroughly with shampoo (step 1)
- Allow for the lather of the shampoo to activate for 3 minutes.
- Rinse the shampoo out of hair completely with abundant water.
- Do NOT use any type of softener or conditioner.

*After step 1, hair will be very dry, due to step 1's removal of all residues.

Step #2

- dry hair completely using a blow dryer

Step #3

- Divide the hair into 4 sections in order to apply the keratin treatment.

Step #4

- Apply the keratin treatment from root to tip, strand by strand beginning with the inferior part of the head, combing to distribute the keratin treatment evenly.

*****IMPORTANT NOTE: Do Not over saturate the hair with keratin*****

Step #5

- Allow the product to work for 30 minutes.

Step #6 – Thermal Fusion A

- Dry the hair with blow dryer and brush from root to tip, strand by strand, starting with the inferior part of the hair until hair is completely dry.

*****IMPORTANT NOTE: Due to the fact that the heat from the blow dryer will perform the first part of the thermal fusion, the dryer the hair, the better the results*****

Step #7 – Thermal Fusion B

- Set iron between 400° F and 415° F. Iron strand by strand, beginning with the inferior part of the hair and ending with the superior part of the head.
- **Iron every strand through slowly. Iron each strand 3 – 10 times. This will determine the success of the thermal fusion.**

Step #8

- Rinse hair thoroughly, removing product with a regular shampoo, or one that you prefer.
- Apply conditioner and finish by combing through your hair to your liking.

We recommend using our line of shampoos and conditioners free of sulfates to make the effects of the thermal fusion last their longest.

*****IMPORTANT NOTE: Do NOT use shampoo 1 (step 1) to remove the keratin from hair, Shampoo 1 should NOT be used AFTER the treatment*****

FOR PROFESSIONAL USE ONLY
APPLY IN WELL VENTILATED AREA
